SECURING YOUR SANA WEB STORE

sana

Your Sana web store integrates seamlessly with your ERP, so its security is of the utmost importance. This is how Sana Commerce helps you create a user-friendly but above all secure online shopping environment for your clients.

Tested and Certified
When it comes to integrated solutions, security is paramount. That's why our e-commerce software is evaluated, tested and certified by Lionbridge, Microsoft and SAP.

Firewalls, IP Restriction and DMZ
You can use a firewall to secure your Sana web store and ERP system. However, you can go even further by also setting up IP restriction or even a Demilitarized Zone.

Closed Source
Our source code is reviewed only by trusted clients and partners to ensure the best quality. This lets us offer the benefits of open source, without granting access to anyone and everyone.

OWASP Best Practices
Excellent security starts with your source code. That's why our developers apply best practices as defined by the Open Web Application Security Project (OWASP).

Password and Credit Card Data Storage
By default, Sana Commerce does not store credit card information – this remains with the payment service provider. Sana Commerce also does not store unhashed passwords.

SSL/TLS
Web stores implemented by Sana always make use of SSL or TLS protocols. These provide security for the data traffic between web servers and browsers.

VPN
Sana Commerce lets you use a Virtual Private Network, a secure private internet connection, for the data exchange between your web store and your ERP system.

Failover
It's possible to set up a failover system using multiple Sana installations. This ensures that your web store is always available for use.

Data Redundancy
If you choose to host your web store with Sana, you can rest assured that your data is safe due to our highly redundant data storage setups

ABOUT SANA COMMERCE

Sana helps businesses all over the world reach their full potential. We offer the shortcut to e-commerce. How? Through 100% seamless integration with SAP and Microsoft Dynamics. Our e-commerce solution leverages existing business logic and data in powerful and user-friendly web stores. This lets our clients focus on improving their customer experience, streamlining sales processes, and increasing sales volume and frequency.

Sana Commerce is a certified partner of Microsoft Dynamics and SAP. Our innovative approach and strong partner network have made Sana the driving force behind over 1,200 web stores worldwide. Thanks to our extensive experience and expertise, we can offer more than just a product — we also support services such as online marketing, Search Engine Optimization (SEO) advice, hosting and design.

Future-proof your business and join our e-commerce movement.
