

# The Power of Smart Financial Integration

**dynavics**

If we take retailers, garden centres, cultural attractions and hospitality venues, it is evident that they are increasingly needing to maximise their revenue streams to stay competitive and meet market trends; and turning to automated solutions to help streamline operations and financial management could be the game-changer required.

As businesses continue to embrace automation, a cloud-based financial tool that integrates with Enterprise Resource Planning (ERP) solutions will become a must-have choice for financial and business efficiency and compliance.

Let's explore how Dynavics can help you achieve this goal, with a clever integration of our latest portfolio solution - Yavrio and Microsoft 365 Business Central.

## Seamless and Powerful

Yavrio is a cloud-based financial automation tool that integrates with Microsoft 365 Business Central; it simplifies and automates bank reconciliations, financial data synchronisation, and open banking transactions, reducing manual effort and increasing financial accuracy.

- Seamless Bank Feeds: Direct integration with UK banks via open banking.
- Automated Reconciliation: Reduces manual processing errors in bank reconciliation.
- Real-time Financial Data: Ensures up-to-date financial insights.
- Secure Transactions: Meets UK financial security standards.
- Scalability: Supports all small and medium sized enterprises (SMEs)

Yavrio's core strength lies in its ability to connect financial institutions and business systems effortlessly, eliminating time-consuming data entry tasks.

## Microsoft 365 Business Central: The Core of Modern Business Management

Microsoft Business Central is the leading ERP solution designed SMEs, designed to help businesses manage finance, operations, sales, and customer service in a single platform.

- Trusted by over 40,000 SMEs globally.
- Unified financial management, integrating accounting, banking, and sales.
- Seamless cloud-based access, making it ideal for remote teams.
- Advanced reporting & AI-powered insights for strategic decision-making.

When Dynavics integrates Yavrio and Business Central for forward-thinking clients like yourselves, the solution becomes super-powerful, significantly reducing the time spent on manual financial processes; Yavrio enhances Business Central's financial capabilities by automating transactions and data flows between banks and ERP systems, to streamline operations:

1. Connecting Bank Feeds:
  - Yavrio connects securely with banks via Open Banking APIs.
  - Transactions are imported into Business Central automatically.
2. Automated Bank Reconciliation:
  - Yavrio matches transactions with ledger entries.
  - Reduces the risk of human error and speeds up financial reporting.
3. Real-time Data Synchronisation:
  - Ensures that Business Central reflects the latest financial transactions.
  - Provides an accurate view of cash flow and financial health.
4. Customisable Workflows:
  - Yavrio allows businesses to set rules for transaction categorisation.
  - Helps in meeting UK financial compliance and audit requirements.

# Solving Your Financial Challenges

Different industries face unique financial challenges. Here's how Yavrio, integrated with Microsoft Business Central via Dynavics, addresses these challenges for you:

## Retail

- UK retailers process billions in transactions annually.
- Managing payments, refunds, and reconciliations is time-consuming.
- Yavrio automates reconciliation, reducing the workload on finance teams.
- Real-time transaction tracking helps retailers manage cash flow efficiently.

*Example:* A UK fashion retailer using Yavrio with Business Central reduced reconciliation time by 40%, improving financial reporting.

## Garden Centres

- Garden centres have seasonal cash flow fluctuations.
- They manage multiple payment methods (card, online, gift cards).
- Yavrio ensures real-time transaction syncing, helping garden centres manage seasonal finances better.

*Example:* A garden centre in Surrey improved financial forecasting by automating reconciliation with Yavrio.

## Cultural Attractions & Museums

- Attractions often rely on ticket sales, donations, and grants.
- Manual finance processes slow down reporting and compliance.
- Yavrio's integration automates financial transactions, improving fund allocation.

*Example:* A UK museum cut down financial processing time by 50% after adopting Yavrio.

## Hospitality

- The UK hospitality sector contributes £59 billion annually to the economy.
- Hotels, pubs, and restaurants deal with high-volume transactions daily.
- Yavrio helps by automating cash flow management, reducing reconciliation errors.

*Example:* A hotel group in Manchester saved 20 hours per month by automating financial data with Yavrio.

## Transforming Your Business

With the rise of Open Banking and AI-driven financial automation, UK businesses like yours are rapidly moving towards fully digital financial ecosystems. The integration of Yavrio with Microsoft Business Central, facilitated by Dynavics, represents the next step in this digital transformation for your business.

### Key Trends Driving Adoption:

- UK Open Banking adoption is growing, with over 7 million users now.
- Businesses using automation for finance management save an average of 30% on operational costs.
- Cloud-based ERP adoption in the UK has surged, with 73% of SMEs moving to cloud platforms.

Our integration of Yavrio with Microsoft Business Central is a game-changer. With Dynavics, we will ensure a seamless transition to automated financial management, accelerating your efficiency, compliance, and decision-making in your business - embracing Yavrio's financial automation could be the smart choice that you need this year.
